Abstract of JP 2004032518 (A)

PROBLEM TO BE SOLVED. To provide a diversity covering method and reception appealates for selecting a suitable antenna without depending only on reception power. SOLVITON: Exten modulated to a plurality of subcarriers by orthogonal frequency antennas, in each of the model selection antennas, in each of the model selection signal of a plurality of use subcarrier is compared with a prodetermined threshold, and a suitable antenna is selected based on the compared with a prodetermined threshold, and a untable automatic is measured and the untured subcarriers is measured and the untured subcarriers is measured and the on the noise level; COPYRIGHT; COGONG_ED
